

EIZO MEDICAL MONITOR WARRANTY PROCEDURE

Was the EIZO monitor purchased less than 21 days ago (3 calendar weeks)?

Yes - Go to point 1

Or

Was the EIZO monitor purchased more than 21 days but is still within warranty?

Yes - Go to point 2

1. 21 Day Warranty

In the event an EIZO monitor develops a fault within 21 days (3 calendar weeks) from date of sale, according to the initial EIZO Invoice, the monitor is covered under the DOA (Dead on Arrival) swap-out cover. This cover allows for a new EIZO monitor to replace the faulty unit.

Please follow subsequent procedures:

- a. The owner shall report the fault, within the 21 days, to the EIZO Customer Support Department on 01344 355756, giving detailed description of fault, return address (including department), contact name and telephone number and unit serial number
- b. The EIZO DOA Agreement Form must be completed and signed by owner to the effect that should any damage (other than the reported fault) be sustained e.g. a scratched screen, then a charge may be incurred for repair or against the replacement. The process will not commence before our receipt of this signed form
- c. We will arrange collection of faulty goods
- d. A Return Authorisation Number (RAN) and Returns address will be provided – which must be clearly marked on all returned goods
- e. The unit must be packed securely in its original box along with ALL cables and accessories. In the event that not all pieces are returned, a charge may be incurred. New cables will be delivered with the new monitor
- f. Calls received before 16.30 will be serviced during the next working day. Calls received after 16:30 will be carried over
- g. Faulty monitors will be collected from site following the delivery of the new monitor

3 & 5 year On-site warranty service (available on any EIZO Medical monitor purchased from 30th July 2007) MAINLAND UK ONLY

In the event an EIZO monitor develops a fault and is no longer subject to the DOA Swapout procedure above, yet is covered by its 3 & 5 year warranty, the EIZO On-Site service applies. This cover allows for a "Double Swap", with the provision of a loan monitor whilst the faulty unit is being repaired

Please follow subsequent procedures:

- a. The owner shall report the fault, to the EIZO Customer Support Department on 01344 355756, giving detailed description of fault, address (including department), contact name and telephone number and unit serial number
- b. The EIZO On-Site Warranty Loan Form must be completed and signed by owner to the effect that the responsibility for any damage to the loan monitor whilst on-site is accepted. The process will not commence before our receipt of this signed form
- c. EIZO will arrange for a loan monitor to be issued and the faulty unit be collected by a contracted specialist company, currently Unitrans Ltd.
- d. Unitrans personnel will remove the faulty unit from the desk and install the loan unit, using the existing cabling
- e. A signature will be obtained from hospital contact to the effect that the loan is seen working correctly. All Unitrans staff must be accompanied by a hospital staff member.
- f. The faulty unit will be securely packed and returned to EIZO for repair
- g. If a loan monitor is NOT required, EIZO will arrange collection of the faulty unit. If necessary, EIZO will provide a suitable box for its return. Cables and accessories will not be required to be returned
- h. Once repaired the above process will be reversed. EIZO will arrange suitable delivery times for both Unitrans and the hospital – to allow minimum disruption to the hospital and its patients
- i. If the Unitrans representative is unable to make contact with hospital staff member on both collection and delivery – a charge of £45 will be incurred
- j. All calls must be received before 15.45 to ensure next working day delivery. Calls received after 15.45 will be carried over

NB. In the event of a faulty unit which is one of a "Matched Pair"

If the fault is deemed to be a screen fault then BOTH units of the 'Matched Pair' will require a screen change to preserve the 'matched pair' status. However, if the fault is not connected to the screen e.g. a power supply fault, then ONLY the faulty unit is needed for repair – further details of this will be given when the call is logged with EIZO

Additional Notes

Unitrans is not permitted to operate any PC/Server whilst on site and will merely connect and operate the monitor
